- Specialized in identifying, analyzing, and resolving bugs to improve system performance and reliability.
- Enhanced user experience by implementing effective debugging and troubleshooting strategies.
- Collaborated with cross-functional teams to deliver timely and efficient solutions.
- Demonstrated strong problem-solving skills and attention to detail across all projects

Shopping Portal, Pixyrs Software & Technology

The shopping project aims to create a user-friendly e-commerce platform with secure transactions, product search, and efficient order management.
- **User Registration and Authentication**:- The platform will allow users to create accounts, log in, and manage their profiles. Registration and login will be secured with email verification and password encryption to protect user data.
- **Shopping Cart and Wishlist**:- Users can add products to their shopping cart and modify quantities or remove items as needed. A wishlist feature will also be available, allowing users to save items they wish to purchase in the future.
- **Order Tracking and Customer Support**:- After purchase, users will be able to track their orders in real-time and receive updates on shipping and delivery status. Additionally, a customer support system will be available for users to resolve any issues or inquiries via chat or email.
- **Secure Payment Gateway**:- The platform will integrate a secure payment gateway to process online transactions. It will support various payment methods, including credit/debit cards, PayPal, and other e-wallet services to ensure flexibility and security.
